

5-24-2014

We had Buddy L & Sons build our home and after 13 years it is still in excellent shape. Through all the storms and high winds we have had zero problems. Everything is glued and screwed. No creaks in the wood floors! We haven't had to do any repairs or change anything other than upgrade the appliances last year, which I think is amazing. During construction Buddy and Mike were very helpful in pointing out changes we might want to make dwhen we were framing. These changes have been great and most did not come with an increased cost or change fee. We did choose to do some upgrades which the materials cost more, but everything was throughly explained and many options were presented. We are stoked at all the upgrades we made and would of been been bummed had we not made them. Still the costs were only reflective of choosing to use better materials or to do something better and were really right in line with the bid. Since then we have used Buddy L & Sons to do some major repairs and remodeling on our comercail building. They had the best price and the work was done fast and perfect. I highly recommend Buddy L & Sons, they do #1 quality work, have intergrity, are very fair, communicate well and stand behind their work.
